CoinList

CoinList Application

CoinList (https://coinlist.co) is getting ready to run Token Sales. The first one will be Filecoin (https://filecoin.io). Afterwards, we will take on more. We have already received many requests to list token sales on CoinList, so we will select a few projects to work with at a time. We are opening up this application process now to find the best candidates.

We will start reviewing applications soon, and we will reach out to selected projects to discuss possibilities on a rolling basis.

Not all questions are required, but the more we know, the better we can make a determination of fit with the CoinList platform.

DISCLAIMER: please DO NOT enter anything that you wish to keep absolutely private or secret. By submitting information below, you give permission to the CoinList team to review it, discuss it, store it, and share it with our partners. We will review these applications with the best intention to help you with your project, and we may need to discuss its details with our partners to figure out feasibility. While we do not intend to share the contents of this application widely, we cannot guarantee secrecy. We DO NOT want to know any information that should remain confidential, and if you share something here, you acknowledge we are not agreeing to keep it confidential.

Your email

Basic Information

What is your name?

Your answer

What is the name of your project?

Your answer

What is the name of your token(s)?

Your answer

Link to your website, if any

Your answer

Links to whitepaper, or other materials, if any

Your answer

Links to any community forums

Your answer

Links to any Github repos

Your answer

About the Project

In one or two sentences, tell us about the system and its economic model

Your answer

What problem are you solving?

Your answer

Who are your competitors? Who might become competitors?

Your answer

What's new about what you're doing?

Your answer

What is the purpose of the token?

Your answer

Could it be done with Ethereum or Bitcoin? Why or Why not? What's useful about a separate token?

Your answer

What stage of development are you in? (research, development, launched, etc.)

Your answer

What traction does your project have?

Your answer

Are you pre-launch or post-launch?

○ Pre-launch (network/token is not live yet)

○ Post-launch (network/token is already live)

If post-launch, how many users are using your network? (eg node count)

Your answer

Are you building on top of Ethereum or a related EVM network?

○ Ethereum

○ Ethereum Classic

○ Other: _____

If on Ethereum, is it an ERC-20 token?

○ ERC-20

○ DIfferent contract

○ Not on ethereum

○ Other: _____

About the Team

Tell us about you. Who are you? What are your backgrounds?

Your answer

Links to github, linkedin, twitter, or other

Your answer

How many people are working on your project? What do they do?

Your answer

About the Organization

Tell us about any organizations or legal entities involved. List any companies, foundations, and other organizations, and what their purpose is. Please make sure to note which legal jurisdiction each organization is in.

Your answer

Do you have legal counsel? If so, what are the firms? (name and links please)

Your answer

Have you raised funding before? How much, and what type? (VC, Token Sale, etc.) What valuation?

Your answer

About the Planned Sale

What level of raise are you targeting? *

○ <$1M

○ $1-5M

○ $6-15M

○ $16-30M

○ $31-60M

○ >$60

When do you want to run your sale? Give us possible date ranges, and whether these are firm or flexible.

Your answer

Do you have any special sale mechanics in mind? (Eg time-based price increases, cap on total raised, etc).

Your answer

What will be the token distribution? (eg how much for the sale, how much for the developers, etc).

Your answer

We'd like to get to know you a little bit. Please record a 1 minute video about you and your project. Introduce yourselves, explain what you're doing and why, what your token is about, and anything else about your project.

The video should contain nothing except you talking. We do not want this to take long to make, it's just a quick explanation.

Upload it to YouTube, unlisted (not private, or we won't be able to see it). No effects, no script, no music. Only talking. Make sure the audio comes out right.

For a sense of what we're going for, see the YC application videos:
https://www.ycombinator.com/video/

Unlisted YouTube link to Video

Your answer

Anything else?
