2018 COMPUTATIONAL LAW & BLOCKCHAIN FESTIVAL
March 16-18, 2018
Worldwide

The first annual **Computational Law & Blockchain Festival** (#clbfest2018) is a three-day global event bringing together coders, designers, lawyers, policymakers, researchers, and students to co-create the future of law, legal practice, and policy. In the spirit of decentralization, the Festival will be hosted at independent, self-organized nodes in cities around the world.

CLICK HERE FOR A LIST OF REGISTERED NODES (http://legalhackers.org/clbfest2018-host/)

The Festival is designed to be as inclusive as possible, with activity tracks for participants of all backgrounds, interests, and skill levels:

LEARN (http://legalhackers.org/clbfest2018-learn/)

New to computational law or blockchain technology? Need a blockchain 101? Want to learn how to write a smart contract? Learn the basics from local and global experts at our educational sessions and workshops.

HACK (http://legalhackers.org/clbfest2018-hack/)

Are you a coder or designer? Take part in our Global Challenge, a distributed, 24-hour hackathon that challenges participants to build open-source computational law and blockchain-for-law uses cases with a chance to win awesome prizes.

**DISCUSS
(http://legalhackers.org/clbfest2018-
discuss/)**

**Interested in policy
implications of blockchain
technology?** Join our Global
Symposium, a distributed
policy hack to discuss core
issues related to blockchain
technology and
cryptocurrencies with the
goal of contributing to a free
and open global survey of
those issues.

So how can you get involved in the Festival? Here are three ways:

- **Host a node:** There's still time to set up a node! Click HERE
  (http://legalhackers.org/clbfest2018-host/) to learn more about how to host a node in
  your city or at your school and to see a preliminary list of nodes.
- **Sponsor or speak at a node:** Would your company or organization like to provide
  financial or in-kind support to a node or nodes? Are you an expert who would like to
  teach a workshop, moderate a policy discussion, or mentor or judge hackathon
  participants? Please email us at clbfest2018 at Gmail for more information on how you
  can help a local node have a successful Festival (note: please include your city, country,
  and company/organization in the email so we can put you in touch with the right
  person).

- **Attend a node:** The Festival welcomes enthusiasts of all ages, genders, backgrounds, skill levels, and disciplines, and will be free to attend and participate. Look out soon for a complete list of local nodes and how you can get involved.

Be on the lookout for more information soon.
