CL+B FEST NODES

Want to host or participate in a node of the **2018 Computational Law & Blockchain Festival**? Great! We're here to help you get started.

Overview: A Decentralized Event in Nodes Around the World

The 2018 Computational Law & Blockchain Festival is a "decentralized conference," a global event centered around a common theme taking place simultaneously in independent, self-organized "nodes" around the world.

Each node will function as a stand-alone conference featuring tracks, content, and speakers chosen by the local node organizers. Anyone who is interested (e.g., a student group, meetup, law firm, company, non-profit, think tank, etc.) is welcome to host a node, and nodes may choose the Festival tracks (Learn, Hack, and Discuss) most relevant to their interests and resources.

Nodes will be connected through exciting global initiatives, including our Global Challenge, a 24-hour hackathon to develop prototypes related to smart contracts and blockchain-for-law use cases, and our Global Symposium, a worldwide policy discussion about blockchain-related law and policy issues.

Register a New Node

If you would like to host a node in your city you **must** do the following:

- Review the CL+B website (http://www.legalhackers.org/clbfest2018) in detail,
- Begin the process of planning your node using our planning resources (http://legalhackers.org/clbfest2018-plan/), and
- Fill out the node registration form (https://goo.gl/forms/LywbcKueLaQgRhvi2).

By registering your node, you must agree to the terms and conditions, including but not limited to committing to hosting a node of the Festival. Please email us at clbfest2018 at gmail with any questions.

Participate in a Node

The map below represents cities that have formally registered to host a node as well as those actively planning a node. If your city is on the map and you would like to learn more about getting involved as a co-organizer, speaker, sponsor, or participant, contact us at clbfest2018 @ gmail. If your city is not on the map, consider registering a node today!
